09.15 – 10.10 Evolution in attitudes towards settlement facilitation in international arbitration

While arbitrators in some jurisdictions are accustomed to being proactive in facilitating settlements, the traditional viewpoint in most jurisdictions has been that the role of the arbitral tribunal is to decide the case in an enforceable award. In the context of the long-standing debate on techniques to save time and costs in arbitration, this traditional view has changed in recent years. The Report on Facilitating Settlement in International Arbitration, published by the ICC Commission on Arbitration and ADR in 2023, is a milestone in this development. The potential impact of this report, as well as other recent studies, will be examined by this panel. Panellists will also consider relevant provisions in arbitration laws and rules that may have an impact on arbitral practice in this area, and the search for transnational standards.

10.45 – 11.30 Case Management Techniques with a Potential Indirect Effect on Settlement

This panel addresses the utility of accepted case management techniques and arbitration procedures that may have an indirect effect on the willingness of parties to settle their dispute or parts of it. Examples of such techniques are a proactive first case management

conference, bifurcation, mid-arbitration reviews, dispositive motions, or sealed offers. The focus of the panel debate will be on the arbitrator staying within his or her role of resolving a dispute by rendering a binding decision and not adopting the role of a settlement facilitator or mediator.

12.30 – 14.00 Lunch

14.00 – 14.45 Arbitrator Techniques for the Direct Facilitation of Settlement

Whether and, if so, to what extent arbitrators are entitled to facilitate settlement is still a controversial issue and one in relation to which regional differences still exists today. This panel will discuss the full array of available techniques, from raising the settlement option at the first case management conference, the use of mediation windows to the presentation of preliminary views and the conduct of settlement conferences by the arbitral tribunal and other techniques. The impact of failed settlement negotiations on arbitral proceedings will also be discussed.
